Discussion was focused on solar ordinance to guide the town in the future with solar energy.

We used different town's ordinances as a basis to begin drafting the Hartford solar ordinance. We drafted language for sections on purpose, authority, applicability, and definitions.

The agenda for next month's meeting will be to work on a section about administration of the ordinance and procedures for permit review. Committee members will review how this is handled in the example ordinances we have in hand.

Meeting adjourned at 7:12PM
